REMARKS:

- 1. No student should enter the Sub-Freshman Class of either course until fully up with it.
- 2. Students not wishing to take either of the above courses, are permitted to select from them such subjects as they are competent to study, and can recite with the regular classes, provided that they pass the entrance examinations in Arithmetic, Elementary Algebra, English Grammar and Geography.

- 3. All the students are required to attend the worship of God in the Chapel daily, and to recite a Bible lesson weekly. Students of the Classical and Scientific Courses will study select portions of the Scriptures, in addition to the usual text books on Moral Philosophy and the Evidences of Natural and Revealed Religion. The President will give frequent lectures on munners, morals and religious duties, intended to train the students to the life of Christian ladies and gentlemen. All who do not reside with their parents are required to attend public worship and Bible class, in some church, on the Sabbath. Students' prayer meetings have been organized; they are well attended. The Faculty regard it as an important part of their work to labor for the moral and spiritual welfare of the student.
 - 4. The degree of A.B. is conferred on students who complete and pass satisfactory examinations in the Classical Course.

The degree of B S. is conferred on students who complete and pass satisfactory examinations in the Scientific Course,

III. NORMAL COURSE.

The regular courses of the College accomplish the ends of a Normal Course. A class in the *Theory and Practice of Teaching* and *The Science of Education*, is organized out of each Senior Class. Any graduate passing an examination in the above subjects, and a special examination in the subjects required of Teachers in the Public Schools, will be entitled to a Teacher's Diploma.

IV. HONOR COURSE.

- I. A course of study, additional to the ordinary or degree course, known as the Honor Course, has been established.
- II. The Honor Course includes six departments, in any one or more of which a student may graduate with Honors, first or second, according to the attainments made. These honors are in no sense competitive. As many as complete the prescribed course receive them. The departments of the Honor Course are as follows:
- 1. The Classics, including Latin, Greek, Hebrew, French and German. 2. Mathematics. 3. Natural Science. 4. Philosophy, in-

cluding Metaphysics, Logic, Moral Philosophy, Political Economy, and the Constitution of the United States. 5. The English Language, including History. 6. The Bible.

In general, not exceeding one-half as much matter in addition to the amount required in the ordinary course, in any of the above departments must be mastered in order to a second Honor; and additional thereto, an amount equal to that required in the ordinary course, in order to a first Honor. No student who does not rank 8.5 in the subjects of the ordinary course will be admitted to an examination for Honors.

- III. Each Professor furnishes gratuitously to candidates for Honors in his department such assistance as they need. Those desiring regular recitations arrange for them with the Professors, or any other persons they may select, on such terms as may be mutually satisfactory.
- IV. Honor examinations will be held the first week of each vacation Senior included, at which candidates for the degree of B. A. or B. S. may present themselves; and those passing in any subject of any department shall be credited with the same. In the case of every candidate, the result of all the examinations will determine the Honor attained.
- V. Candidates for the degree of M. A. may in like manner present themselves for examination in any of the departments named above, at any honor examination, and those passing in any subject will be credited with the same. The result of all these examinations will determine the Honor attained on taking the M. A. degree.
- VI. The result of all these examinations will be entered on the College Register, and publicly announced.

TEXT BOOK AND BOOK OF REFERENCE.

Harkness' Latin Grammar, and Cæsar, Allen's and Greenough's Virgil and Cicero; Chase and Stewart's Livy and Horace: Tyler's Tacitus; Kingsley's De Oratore: Goodwin's Anabasis, &c.: Anthon's Memorabilia; D'Ooge's Demosthenes; Wheton's Lysias; Tyler's Apology and Crito; Woolsey's Alcestis; Loomis' Mathematical Course; Comfort's German Course; Longuellier and Monsanto's French Grammar; White's Latin Dictionary; Liddel and Scott's Greek Dictionary; The Students' Series of Histories; Smith's Classical Dictionary; Brown's Roman and Greek Literature, and Allen's Classical Handbook.

The continental system of pronouncing Latin and Greek has been adopted.

MISS C. M. WHITE, PRINCIPAL.

TWO YEARS' COURSE.

FIRST YEAR.

Principles of Perspective, demonstrated by blocks and drawing. Dictation Exercises; required from each Student, drawings illustrative of principles given.

Perspective, as applied in drawing from the Geometrical Solids.

Free hand and Instrumental Drawing alternated, giving boldness with precision.

Botanical Drawing—Leaves and flowers from Nature. Subjects given and original designs required from each student.

Pure Form, Light and Shade.—Drawing from Antique wares, Greek Vases, &c.

Ornaments in Relief—in plaster—including historical figures, such as the Acanthus leaf, with explanation of where each is used in architecture.

SECOND YEAR.

Fragments of Antique Statuary—the human figure—Head, Hands, Feet, Arms, &c.

Perspective—angular and parallel. Applied in sketching from natural landscape and interior of room.

First Principles of Composition Color,—Lecture on Harmony of Color; Painting from still life—drapery, fruit, etc., or copying *good* pictures, original designs.

The facilities for the study of Art in the College, have been greatly increased during the past year, rooms having been fitted up with special reference to the study of Object Drawings, Drawing from the Solid, Pure Form, Light and Shade, with Perspective.

For those wishing to obtain a thorough knowlege of the Principles underlying all true art, the two years' course adopted will prove most valuable.

It has been our object to make this Department entirely practical, that those who mean to make the subject a special study, may lose no time, and that all who enter may be really gainers, able, after leaving school, to build upon the foundation here given. Advancement is easy and natural from Object Drawing to Drawing from Nature.

This Course is arranged with particular regard to the Scientific Course, taking the place, at the option of the Student, of Modern Languages. Recitations daily.

This department has been re-organized with the intention that the facilities afforded shall be second to none in any similar institution. The Academy building is pleasantly situated, commodious and comfortable, in thorough repair, newly fitted up and furnished.

The following courses of study have been adopted:

- 1. A Preparatory Course of two years' study for those designing to enter Monmouth College.
- 2. A Grammar and High School Course of three years, practical and thorough, for such as do not intend to enter College.
- A Normal Course and Practical Training School of two and one half years, to prepare teachers for common schools.

I. THE MONMOUTH COLLEGE PREPARATORY COURSE.

This Course has been extended, and students will have two years' instruction in Mathematics, Latin, and English, to fit them for College. It is aimed to make this instruction thorough and complete, and also to provide facilities for students to master the common school studies if they have been neglected.

STUDIES AND TEXT BOOKS.

1ST. JUNIOR YEAR.—Penmanship; Worcester's Speller; Webster's High School Dictionary; Wilson's Fifth Reader; Anderson's United States History; English Exercises; Greene's English Grammar; Stoddard's Intellectual Arithmetic; Practical Arithmetic; Harkness' Latin Grammar and Latin Reader; Bible.

2D. SENIOR YEAR.—Penmanship; Spelling; Reading; English Analysis; Punctuation; Intellectual Arithmetic; Arithmetic; Elementary Algebra; Latin Grammar and Latin Reader; Cæsar; Bible.

II. THE GRAMMAR AND HIGH SCHOOL COURSE.

This short, practical course will give a thorough training in English studies and in the elements of the Natural Sciences and the Mathematics. It will be the aim to make this as useful as possible to those who cannot afford to take a collegiate course, and it is believed that the instruction and mental training will be found to be invaluable by those who complete the studies of this department.

The studies and text books are the same as those of the Normal Course, except that an extended course of Ancient and Modern History takes the place of Theory and Practice of Teaching.

III. THE NORMAL COURSE.

The special attention of those desiring to qualify themselves for teaching in common schools is invited to the practical Training School department. Every student will be thoroughly drilled in the studies pursued in the public schools, and will be instructed in the best methods of teaching them.

The time required to complete this course is two and one half years, and ends with the month of March, in order that graduates may secure schools for the Spring term.

A Teacher's Diploma will be awarded to all who complete this course to the satisfaction of the Faculty.

STUDIES AND TEXT BOOKS.

1ST. JUNIOR YEAR —The same as the Junior Class, Preparatory Course, except that Physical Geography and Zoology take the place of Latin

2D. MIDDLE YEAR.--The same as the Senior Class, Preparatory Course, except that Physiology and Botany and Philosophy take the place of Latin.

3D. SENIOR YEAR.—Rhetoric and English Language; Geometry; Mental Science; Theory and Practice of Teaching; Model Recitations; Review of Common School Branches; Bible.

ADMISSION, ETC.

The Academy, like the College, receives students of both sexes on the same footing. Applicants should be at least thirteen years of age.

No examination will be required for admission to the Junior year, but promotion for advanced standing in any course, can be secured only by passing rigorous examinations.

The students of the Academy will be entitled to the same privileges as the College students, in regard to Libraries, Cabinet Experiments and Lectures.

Students of all courses in the Academy will be instructed in the principles of Book-Keeping, and in the uses of business forms.

During the entire course there is a weekly Bible recitation. Rhetorical exercises will be required of all the students. The President will deliver lectures, monthly, on manners and morals.

To secure the full advantages of the course, the students should enter at the beginning of the college year and remain until its close. No student can be absent a term without great loss. If unable to complete the course without interruption, it is ordinarily much better to discontinue an entire year.

The Department of Music, under the charge of Prof S. H PRICE, affords facilities for the study of this subject seldom found in an institution of this character.

A regular course of instruction has been arranged in this Department, which course can be taken, at the option of the student, instead of German in the Scientific Course.

I. The requirements for admission to the several classes are fully stated in the outline of the different courses. No candidate will be admitted to the Sub-Freshman class of either course, whose deficiencies exceed what may be made up in five months by an additional recitation. Candidates for advanced standing must furnish satisfactory evidence of proficiency in all the previous studies of the course they propose to take. No student of known immoral character, or whose influence is likely to be injurious to good order, will be admitted.

II. The Statutes of the College, Chapter II, Section 3, provide that "No student shall be permitted to enter at a later period of the course than the commencement of the first session of the Senior year." The spirit of this law, in the judgment of the Faculty, requires at least one full year's attendance of a student on the exercises of the College in order to graduation. Under no circumstances will this rule, as thus interpreted, be relaxed while the above statute remains unrepealed.

III. The Senate has adopted the following as an additional chapter to the College Statutes:

"Section 1. All persons matriculating shall be regarded as students, and on payment of the required fees shall be entitled to all the privileges of the College.

"Sec. 2. Connection with the College is terminated by graduation or dismissal, honorable or otherwise.

"Sec. 3. The privileges of the student shall be suspended in all cases of failure to pay the required fee and attend on instruction; provided, however, that the following privileges, namely, that of examination with his classes, active membership in the societies, representing societies and classes on public performances, and the use of the Library and Reading Room, may be granted to students temporarily absent for a period not exceeding one year, on written permission from the Faculty and the payment of two dollars per term.

"Sec. 4. All persons enjoying any of the above privileges shall be subject to College discipline, the same as if in actual attendance."

The Faculty judge the attendance of a student on the exercises of the College at least three-fifths of any year as necessary to complete satisfactorily the work of the year, and, therefore, will not, under ordinary circumstances, grant leave of absence, with the privileges of examination without recitation, during any one year exceeding four months. Any one being examined, without having recited with the class, will be required to pass an examination doubly extensive. No student should attempt to prepare for examination in more than two-fifths of the subjects of any year, without recitation. The Faculty are unwilling to grant leave of absence to any Senior. Seniors should be in attendance the entire year.

- IV. There are during the year public exhibitions of the College classes, as follows: Of the Junior class in May, and of the Sophomore in November. These exhibitions are held on such evenings and in such places as the Faculty may appoint.
- V. At the meeting of the Senate in June, 1874, the following was added to the statutes of the College as Sec. 4 of Chap. XIII: It shall be unlawful for any student of this College hereafter, to become a member of any secret College fraternity, or to connect with any chapter of such fraternity.
- VI. In regard to marking, grading and examinations, the follow-principles have been adopted:
- t. Each recitation is marked on a scale of to—9 indicating ordinary excellence, 10, extraordinary; these marks are averaged in each subject, monthly, and entered on the Monthly Record. The actual attendance is marked on the same scale, and entered on the same record. To be marked to, in attendance, on the Monthly Record, the student must have been actually present at every roll call of his class during the month.
- 2. Each class is examined on each subject as soon as completed the examination of each student is marked on the same scale and entered on the Annual Record. To pass, the student must answer at least 70 per cent. of all questions asked him correctly. No student is credited with any subject until he has been examined and passed in it. The average of the marks received for all the recitations and for the examination, in any subject, determines the student's grade in that subject.
- 3. The Grand Average of the marks received in all the subjects in which the student has been examined and passed with his class

MONMOUTH COLLEGE.

- 4. No student in the Collegiate Department is promoted from a lower class to a higher, whose deficiencies exceed what may be made up in one year by a single recitation daily.
- 5. The Salutatory and the Valedictory, on Commencement Day, are delivered, the former by the Senior Scientific, the latter by the Senior Classical, who rank highest.
- 6. In order to secure thoroughness in the elementary subjects, each College class will be required to pass a special examination, after a review conducted by a Professor, in Geography, Arithmetic, English Grammar, The Use of the English Language, and Business Laws and Forms; and in addition to the above, Classical students, in Latin and Greek Grammar. To pass in these subjects the students must make an examination grade of S. Students admitted from other Colleges, whether on certificate or examination, must pass in all the above subjects in which the class which they may enter may have been examined. The terms during which these reviews and examinations will take place are indicated in the "Courses of Study."
- VII. Reports are sent to parents or guardians at the close of each term. The President should be notified of every case where a report fails to come within ten days after the close of the term.
- VIII. The statutes expressly forbid students to use intoxicating drinks as a beverage, to play cards, to frequent drinking, gambling, or billiard saloons, or improper places of resort of any kind. The Faculty judge places of amusement, commonly called "balls" and "dances," to be improper places of resort for students.
- IX. Ladies and gentlemen are admitted to all the privileges of the College on the same footing.

A new wing, 53x63 feet, has been added to the College Building by the liberality of the citizens of Monmouth, which will be ready for occupancy Sept. 1st. This wing contains rooms for Apparatus, and Cabinet and Chemical Laboratory and Natural Science Lecture Room, 4 Recitation Rooms, and Chapel 53x60 feet.

LIBRARY.

The Library contains about two thousand volumes, selected expressly for the College. It is accessible to all the students. The County Library and Reading Room is open to all the Students free of Charge.

APPARATUS.

An extensive Philosophical and Chemical Apparatus has been procured and is now in successful use. It affords the means for a satisfactory illustration of the most important principles in the various departments of Astronomy, Natural Philosophy and Chemistry. A new Oxy-Hydro Stereopticon has been lately purchased of Stevens' Institute instrument maker, giving facilities for experiments in Chemistry, Magnetism and Optics, and illustrations in Geology, Physiology and Natural History, and with Gas Microscope attachment, in Microscopy.

CABINET.

The College Cabinet, which already contains a large assortment of Coins, Geological specimens and other articles of interest, collected by Dr. Barnett in Palestine and Egypt, as well as a Geological Cabinet donated by the State, has, recently, been enriched by the donation of a valuable assortment of Minerals by Rev. T. D. Davis, of Missouri, the purchase of a large variety of Corals, the donation by the Rev. J. C. Nevin, of Canton, China, of his valuable collection of Chinese

MONMOUTH COLLEGE.

Curiosities, and by the contribution by Rev. Dr. Lansing, of Cairo, Egypt, of a cast of the famous Tanis Stone. The College Cabinet is now one of the finest in the State.

LITERARY SOCIETIES.

There are four Literary Societies in the College—the *Philadelphian*, *Eccritean*, *Amateurs des Belles Lettres*, and *Aletheorian*. These are all on a good footing, and afford to their members respectively the opportunity of improvement in the branches of learning for the promotion of which they are established.

GOVERNMENT.

It is the aim of the Faculty to secure good order and diligence in study by the force of moral and religious principles, rather than by direct exercise of authority. Those who persist in neglecting their studies, or in pursuing disorderly courses, or in exerting an evil influence, will not be permitted to remain in connection with the College.
